To whom it may concern

I would like to state that I DO NOT support an extension of the emergency powers.

Over the 22 months during the pandemic 273,901 Australians died; however, only 2639 were Covid related. Of this 2639, 92% of these died having three serious underlying conditions. This data shows this is NOT an emergency and does not support the government extended their emergency powers.

Mandates have done nothing to stop the spread. Since mandates began 16 December 2021 the average number of cases has been 8031. It is very clear it is not just the unvaccinated spreading the virus and mandates have done nothing to stop the spread.

A massive amount of resources has been wasting on policing these mandates. Small business as suffering financially, people are suffering mentally; one example is our neighbour committed suicide due to lockdowns. I can only imagine the other significant negatives effects this had had on our communities. On top of this we have lost huge amounts of qualified and highly skilled workers because of these mandates. Can we really afford this for our health systems and educational settings?

I call on the premier and State MP's to immediately end all mandates and let Queenslanders return to their lives.

Regards
Kimberly McLaren
