---

I strongly object to extending the emergency bill past its expiry date on 26/03/2022.

The following reasons should be very carefully considered.

- The Australian Bureau of Statistics has released evidence of exaggerated death numbers caused .
- Experimental vaccines have proven ineffective.
- Statistics show that most deaths from covid are in the higher age group or people with underlying conditions.
- It is evident worldwide that the virus is weakening by the day and further government intervention is not necessary or wanted.
