**Subject:** RE: extension of expiring provisions bill  
**Date:** Friday, 4 March 2022 11:08:51 AM

---

Dear Sir/Madame,

I am writing in regards to the bill amendment - PUBLIC HEALTH AND OTHER LEGISLATION (EXTENSION OF EXPIRING PROVISIONS) AMENDMENT BILL 2022. I strongly disagree with a further extension of this bill.

Extension of the already unreasonable powers would cause further danger to our society. The current mandates require almost everyone to be double vaccinated or lose their jobs. This is coercion and this is not the Australian way. This is the only reason I am vaccinated. This discrimination needs to stop.

As a nurse I am constantly seeing the negative effects of the current vaccinations and I believe they far outweigh the effects of Covid-19. The Cumulative Analysis of Post Authorisation Adverse Events Reports dated 28 February 2021 has 9 full pages (over 1000) of adverse effects from the vaccines. Furthermore, these adverse effects are damaging and even ending the lives of people of all ages, (included children) here and around the world. The median age of confirmed deaths directly from Covid in Australia, as reported by the ABS since the pandemic began until Jan 31st, 2022, is 83.7 years. This does warrant the introduction of vaccine mandates through emergency powers which put the lives of all Australians at risk.

The original bill should never have passed. Emergency Powers are not required, extension of these would be inexcusable. The tyranny needs to stop, I implore you : do not pass this bill.
