Subject: EXTENSION OF QUEENSLAND'S STATE OF EMERGENCY
Date: Friday, 4 March 2022 11:10:09 AM

SUBMISSION TO THE QUEENSLAND PARLIAMENTARY COMMITTEE INQUIRY INTO

EXTENDING QUEENSLAND'S 'STATE OF EMERGENCY':

Under the Public Health and Other Legislation (Extension of Expiring Provisions) Amendment Bill 2022, Queensland's 'state of emergency' laws will be extended from 30 April 2022 to 31 October 2022.

MY NAME: Nadine Williams BSc. Hons. ACIEA. PGCE

[REDACTED]

[REDACTED]

MY POSITION ON THE MATTER:

I am AGAINST the extension of the 'State of Emergency' in Queensland.

Evidence:

1. COVID-19 is now a mild illness.

- I am aged 50 and had Covid-19 over Christmas, along with my family, of husband, age 49 years and 2 children, 17 and 13 years. Our major symptom was lethargy and fatigue which probably lasted just over a week. The scratchy throat and throbbing headache was over within 24 hours. RAT confirmed.
- *We are grateful to have very strong natural immunity. As a scientist that specialises in the teaching of biological systems, especially the immune system, it has been found that natural immunity is far superior to any medical intervention. The B and T memory cells remain in the body for life and the B plasma cells with the antigen receptors on their surface produce specific antibodies to the spike protein at a phenomenal rate of over 2000 per second. This mind blowing fact is just one of the many that our immune response conducts. On the contrary, medical interventions such as vaccinations confer artificial immunity that has not been found to confer any sterilising immunity, neither has it reduced the claim of hospitalisations and death.
- <https://thepulse.one/2021/11/23/130-research-studies-affirming-the-power-of-natural-immunity-to-covid/> Epidemiologist Dr Paul Elias Alexander is a former assistant professor at McMaster University in evidence-based medicine and research.

- Proper health actions of citizens must be promoted. These include; balanced diet (less hydrogenated fats that are prevalent in fast foods), less alcohol, reduce or cease smoking, maintain a balanced weight according to age and height, ensure sufficient Vitamins C, D, K are ingested together with minerals such as; zinc, magnesium and calcium. Exercise is superb for emotional and physical well being in addition to maintaining the health of bones against atrophy.

2. DEATHS FROM COVID:

- The latest Australian Bureau of Statistics information states that over 22 months of Covid, 273,901 Australians died. However, of these deaths only 2,639 people were Covid related with 92% of these having 3 serious underlying conditions. We need to raise awareness of comorbidities and their impact on health when confronted with pathogens that seek to invade the host individual.
- Some 100,000 died of cancer, 32,999 died of heart disease, 30,000 died of Alzheimer's and dementia; and 10,000 died of diabetes.
- Covid related deaths represent fewer than one per cent of the total deaths in Australia over the past 22 months.
- The median age of death was 81 years for men and 86 years for women. Both of these are above our national average life span.
- Far more people died from the flu than Covid. We had 2,639 Covid deaths over 22 months. However, over a period of 12 months in 2019, 4,124 people died of the flu. That is a far worse death toll than the Covid death toll. ABS website figures.
- The vaccination mandate in Queensland began on 17 December 2021, when we had 2,227 cases and a fully vaccinated status of 83.6%. Just over 2 months later, Covid cases in Qld had jumped to 532,273 with a fully vaccinated status of 90.6%. Since the mandate started in Qld, the state has averaged 8,031 new cases per day. During the same period, the number in the state who are unvaccinated has fallen from 16.4% to 9.4%, yet we have recorded 530,000 new cases.
- This data shows that the MANDATE IS A COMPLETE WASTE OF TIME. IT HAS MADE ZERO DIFFERENCE TO STOPPING THE SPREAD OF COVID THROUGH QLD.
- Queensland has made the Covid health response worse by standing down 4,000 highly trained health workers and we have lost specialised staff in aged care and home care services, as well as police, paramedics, teachers, etc and shut down businesses due to mandates.

3. THIS STATE OF EMERGENCY IMPACTS ABILITY TO WORK:

- I am a Lead Teacher (advanced skills) and I need to get back to work. I am prevented from earning a living due to my choice not to take a medical intervention that does not stop me from catching Covid. I then had Covid and was not very ill. As above, I now have natural immunity. I have not applied for an exemption as per ATAGI rules as this is only for a temporary period of 4 months until I am back to square one and being coerced to undertake the same procedure.

- I am a senior science teacher specialising in Biology and Chemistry. I have worked internationally and have vast experience of excellent school based practice in both public and private establishments. How many other cases are like this, where the education of students is being affected because healthy and experienced teachers are not allowed to work? We are prevented from teaching students the critical skills necessary to navigate the world ahead of them. All because I, along with thousands of others have not taken a medical procedure. There are thousands of us.
- Mandates on doctors, nurses, paramedics, police officers, supermarket workers, etc must be lifted as these people need to return to work. Threatening people with their livelihood does not serve the community health, it creates division, takes away our human rights, promotes Discrimination, is unfair, unjust, is not about health, is coercive.
- It is coercive to DEMAND that I am vaccinated to do my job. The Australian Immunisation Handbook states that there must be full valid and informed consent given without coercion or pressure. I cannot consent while I am threatened with my job.
- Recent information released by the FDA in the United States of America has listed a huge volume of adverse reactions that were not transparently available for public perusal during the brief clinical trials. Some adverse reactions are significant, none more so than the loss of life of individuals that we have also witnessed here, in Australia. It is therefore reasonable to assume that citizens are required to be fully informed before such a decision is taken to undergo this medical procedure. Furthermore, research coming from Sweden has demonstrated that the components of the vaccine enter hepatic cells and with the assistance of reverse transcriptase enzymes can actually produce DNA that will be incorporated into the original molecule of life.

4. NO COVID-19 EMERGENCY:

- There is no emergency. The recent weather event which has caused flooding in the South East Region has shown that the fear of Covid is over.
- There have been no excess deaths compared to the yearly seasonal flu. In fact, the Australian deaths from Covid (not with Covid) are under 100 (according to government's revised figures).
- The reported large Case numbers since the Covid-19 outbreak in Australia that are promoted are not evidence of illness. A case is a positive test result. It does not state that someone is ill. A lot of cases are doubled due to repeat tests. I myself conducted 2 Rapid Antigen Tests as the first was negative. Also, positive test results were sometimes false positives (as PCR tests have been found by overseas countries like Portugal, UK, USA, etc to be unreliable in their ability to distinguish between the flu and Covid-19).

I sincerely trust that you will grant my request to deliberate carefully before deciding to extend the state of emergency your most considerate attention.

I thank you in anticipation of a positive result for all the citizens of Queensland and to Australia as a whole.

Warm regards

Nadine Williams
