To: Committee Secretary, Community Support and Services Committee:

RE: PUBLIC HEALTH AND OTHER LEGISLATION (EXTENSION OF EXPIRING PROVISIONS) AMENDMENT BILL 2022

I would like to submit my response to the proposed bill to:

- further extend the operation of essential public health measures implemented to facilitate Queensland's response to the COVID-19 pandemic
- extend amendments to the *Corrective Services Act 2006*, *Disaster Management Act 2003* and *Mental Health Act 2016* to support the public health response.

Based on a substantive body of evidence, I believe that such an extension is unnecessary, ill-advised, unjustifiable and would be damaging to Queenslanders already severely impacted by two years under a State of Emergency. I provide evidence to support my position that there is no reason for the temporary pandemic and emergency measures to be extended.

The proposed bill for a virus that has shown over 12 months to have a CFR (Case Fatality Rate) of 0.1% for those under 60, with 71% of people who died of/with COVID having underlying health conditions according to the ABS, here:

<https://www.abs.gov.au/articles/covid-19-mortality-2> - makes the extension measure, especially with the event of Omicron, unjustifiable.

1) emergency measures such as lockdowns, for example, had no positive benefit.

[https://www.thelancet.com/journals/eclinm/article/PIIS2589-5370\(20\)30208-X/fulltext](https://www.thelancet.com/journals/eclinm/article/PIIS2589-5370(20)30208-X/fulltext)

2) Masks offer little to no benefit or protection from COVID. Emergency measures such as mask mandates therefore have little effect and are unnecessary.

<https://www.acpjournals.org/doi/10.7326/M20-6817>

3) Emergency measures such as vaccination mandates because of the claim of safety and efficacy are fallacious: COVID vaccines are not proving to be either safe or effective. This document has collected over 1000 medical articles raising questions about vaccine safety: <https://www.informedchoiceaustralia.com/post/1000-peer-reviewed-studies-questioning-covid-19-vaccine-safety>

Of note: every single infection in QLD was brought in via vaccinated individuals. Therefore, the vaccines were ineffective at preventing transmission.

Vaccine mandates were ill-advised and damaged people's lives, health and the economy. See articles attached.

Many countries around the world have now dropped their COVID19 emergency measures due to COVID19 becoming endemic. Currently the UK, Denmark, Norway, Sweden, Iceland and others have no more emergency measures in place. The NHS vaccine mandate in the UK was reversed due to pushback by more than 80,000 doctors, nurses and healthcare workers who had first-hand experience of both risks and benefits of COVID19 and of the vaccine as a 'public health emergency response,' and who worked through the Alpha, Delta and Omicron waves without vaccines.

Chaand Nagpaul, BMA council chair: 'today's decision is the right one and is a more proportionate approach that takes into account the changing nature of covid-19.'

<https://www.bmj.com/content/376/bmj.o269>

Here is a literature review and meta-analysis from Johns Hopkins Institute for Applied Economics: the study shows that emergency measures such as quarantine and lockdowns do not have any positive impact on preventing transmission, reducing spread, illness nor overall mortality around the world. Therefore, any more of this would have no place in Queensland's future.

While professionals such as teachers, paramedics, doctors and allied health professionals have lost their jobs in QLD due to vaccine mandates, these articles came out:

November 2021: Pfizer trial fraud - published in the BMJ

<https://www.bmj.com/content/375/bmj.n2635>

After that, Swedish physicians called to halt their rollout:

<https://peckford42.wordpress.com/2021/11/08/swedish-physicians-launch-petition-to-suspend-pfizer-jabs-after-trial-fraud-allegations-surface/>

In 2021, just as Queensland brought in vaccine mandates for educators and divided society along vaccinated/unvaccinated lines, Pfizer's initial trial data was released by the FDA after a ruling by the USA Supreme Court. The FDA wanted that data hidden for 75 years, but their request was overruled.

Pfizer's early trial results on Adverse Events show that:

As of February of 2021 there were:

- over 1,200 reports of death;
- tens of thousands of reported adverse events;
- 23 cases of spontaneous abortions out of 270 pregnancies and more than 2,000 reports of cardiac disorders.

A further 10,000 documents have been released March 1, 2022. Here's the link to Pfizer's data on the above adverse events.

<https://phmpt.org/wp-content/uploads/2021/11/5.3.6-postmarketing-experience.pdf>

Being vaccinated can make a person more susceptible to ADE. This is an essential risk disclosure that the public was not made aware of in the vaccine rollout and which was known already in March 2021, before mandates came into effect as an 'emergency measure.'

<https://pubmed.ncbi.nlm.nih.gov/33113270/>

This is from the FDA advisory committee in September of 2021.

The 'elephant in the room' is that according to members of that committee, the vaccine kills two people for every one person it saves. (4 hour 10 minutes)

Vaccines and Related Biological Products Advisory Committee – Sept 17 2021 at the 4 hour ten minute mark.

The following article was published at the same time that QLD government shut people who were not vaccinated out of society. Stigmatising 'the unvaccinated' is not justified medically, and has serious repercussions socially, according to the Lancet 20 November 2021.

[https://www.thelancet.com/journals/lancet/article/PIIS0140-6736\(21\)02243-1/fulltext?fbclid=IwAR3Pd274AVDeLCGSzpx83wpovokxJmDWJZS52LVmV8OQQcmmRLA8dFrTums](https://www.thelancet.com/journals/lancet/article/PIIS0140-6736(21)02243-1/fulltext?fbclid=IwAR3Pd274AVDeLCGSzpx83wpovokxJmDWJZS52LVmV8OQQcmmRLA8dFrTums)

The following article warns against vaccinating children - while QLD pushed ahead.

<https://www.sciencedirect.com/science/article/pii/S221475002100161X>

Viral load in un/vaccinated individuals. This information was available before QLD came in with their mandates. Shutting out unvaccinated people for the public health emergency was ill-advised.

<https://www.medrxiv.org/content/10.1101/2021.09.28.21264262v1>

Increases in COVID were unrelated to number of vaccinated individuals:

<https://link.springer.com/article/10.1007/s10654-021-00808-7>

As of February 2022, a study found vaccine mRNA and spike in lymph nodes for 60 days after the shots. +-50 researchers worldwide collaborated on this preprint work.

[https://www.cell.com/cell/fulltext/S0092-8674\(22\)00076-9](https://www.cell.com/cell/fulltext/S0092-8674(22)00076-9)

As an endnote: the South African physician who first alerted the world to Omicron was pressured not to call the variant 'mild.'

<https://www.news.com.au/technology/science/human-body/south-african-gp-who-raised-alarm-about-omicron-says-she-was-pressured-not-to-call-it-mild/news-story/f236e9a9803e4bc7b440029a7c57bf03>

I draw attention once again to the PDF of more than 1,000 peer reviewed journal articles documenting the severe risk of injury and mortality caused by the covid vaccines which should be enough to drop the mandates.

<https://www.informedchoiceaustralia.com/post/1000-peer-reviewed-studies-questioning-covid-19-vaccine-safety>

Extending emergency measures would provide no conceivable health benefit to Queenslanders.

Thank you for your consideration,  
Regards,  
Shelley Davidow
