Dear Sir/Madam,

I fiercely oppose the extension of the 'essential' public health measures implemented by the Queensland Health Minister. I abhor the possibility this can then be continued for another 2 years after the 'supposed' finish date 31st October, 2022. This fiasco has never been about Public Health! The flu this year was no worse this year, than any others. In fact, 2019 had a greater flu death rate than 2020.

This has been a calculated program of fraudulent deception of the long-suffering Queensland citizens. This public health 'emergency' has long ago ceased to be an effective response to the alleged Covid 19 outbreak which has thoroughly manufactured and elaborated on by the elected Members and Public Servants of the Queensland Government. While the members of the Government have been exempt from the harsh restrictions that the rest of Queensland has suffered - the time to stop this has long past and must not be extended beyond the already promulgated date 30 April, 2022.

The much-vaunted use of the PCR test which was never designed to be a diagnostic tool and which has been used to falsely boost the advertised case numbers, which was then used by your government to frighten the public and force restrictions on both private citizens

and business activity. This was an over-reach into private lives. The restrictions must now be lifted. These restrictions have now been proven to be a fraudulent use of power and control by your government over a long period and the inconvenience caused by these restrictions will not be forgotten when next we go to the Polls. To continue with these restrictions beyond the 30th April, 2020, will result in a humiliating result at the Polls for your government.

Notwithstanding the fact that elected Members of government and Public Servants were not affected by loss of income; vaccination mandates; restricted access to businesses, hospitals, health care and aged care facilities, social and community facilities, childcare and school facilities; and lockdowns! We the general public, private citizens and business owners, including you, members of the government, have not been in this together!

We the general public, have had enough!

You, the members of the government have ruined flourishing businesses, divided families and friends, significantly increased the death rate from depression and suicide and are responsible for the huge number of adverse reactions and deaths from the lockdown and vaccination mandates.

The only people who have benefited from this Covid 19 'Emergency' have been those involved in providing so-called health and protective 'information', namely the media, social media platforms, government health ministers and public servants and medical organizations, including doctors; as well as those places procuring and dispensing the so-called 'vaccination', namely and firstly the big Pharmaceutical companies, 'vaccination' hubs and all the public and private places that were used as hubs. They have profited hugely, while the general public has suffered and lost hugely! Enough!

While all the time, shutting out alternative health information from eminent medical specialists in their various fields of research and

medicine, almost completely censoring their ability to share health information, that actually worked and saved lives, with the general public. Not only were they censored, but they were belittled and persecuted.

ARE YOU LISTENING?

When are you despicable lot going to start listening to the people?

You work for us! We put you there! And we can take you out!

You are in government to do the greater good for the people you govern - not to feather your own nest!
