Emergency Bill

Sent from my Galaxy

Please stop this bill. Our nation our states, men, women, children have had enough of the lies ,people dying from the so called vaccines, jobs lost, businesses shutting down, families and friends divided and people suiciding. Also people are being stopped going into hospitals and age care. And sadly if there was some flu so serious why was hydroxychlorloquine and ivermectin stopped in the beginning and promoting vitamins and minerals and good health. It laughable that now ivermectin has been allowed under a different name. Please stop the bill.
