Subject: I'm against extension of the emergency Bill
Date: Friday, 4 March 2022 11:29:36 AM

I oppose the extension of the emergency bill. I do not want to see this bill extended. This one, to be clear “ Public Health and Other Legislation (Extension of Expiring Provisions) Amendment Bill 2022”

This bill is based on covid death rates in Qld and covid numbers in the population. Statistics clearly show the death rate is minimal and covid rates in the population are clearly in rapid decline. If the infection rates are in decline- we don't need an extension on this bill! The entire basis for the bill is gone- it never actually existed in some aspects! Therefore the extension is entirely unwarranted.

Mandates need to be removed to allow equal access to all services to all Australians. Those opposed to these bills and mandates are often physically not even able to be present in parliament due to the “green tick“ mandates. That's akin to not letting Indigenous people vote on land rights!

Unjust. Unfair. Unreasonable.
