Subject: DO NOT EXTEND EMERGENCY BILL PLEASE
Date: Friday, 4 March 2022 11:38:45 AM

Hi there

We DO NOT Want an extension on emergency bill, so many tourism and hospitality operators are affected and we find it is segregation, discrimination and costly effects to business and huge mental health impacts and failed relationships as a result,.

I have had to change jobs twice due to covid impact and then mandate from last job which is ridiculous as against the federal constitution and informed medical consent.

I have done thorough research and am horrified of the discrimination, hate and division these mandates have caused. This country is supposed to be free

You have now dropped masks and you can easily fix the critical shortage of workers in education and health and hospitality industry so please drop mandates .
