Dear Committee Secretary,

RE: PUBLIC HEALTH AND OTHER LEGISLATION (EXTENSION OF EXPIRING PROVISIONS) AMENDMENT BILL 2022 (BILL)

I write for myself and on behalf of my family, where we formally advise that we do not support the Bill nor the extension of the state of emergency or the Public Health and other Legislation (Extension of Expiring Provisions) Amendment Bill of 2022. There is no justification for the extension. FOI requests have not been able to produce the documentation of the isolation of the SARS-COV-2 (virus), how can a pandemic be in existence without the virus being isolated? What verifiable evidence can be provided to the public that there is in fact a state of emergency?

The fear generated by the management of this pandemic has and continues to cause more harm to people's mental and physical health which are depleted now after over 2 years of over-management and their financial resilience degraded because of the misguided administration of the situation. The state and national economies have suffered under this form of management, destroying many small businesses, with many people forced out of their jobs and education of our children disrupted with the promotion of the mandates. The over policing of the population to control the public is unjustified and immoral.

Death rates from covid have been clearly overstated, our TGA and CDC acknowledging 8.6% and 6%, respectively, of COVID-19 deaths could be solely attributed to the virus. It has been stated that only 83 people have died of covid not with covid. The many statistics used to promote the fear of pandemic have been manipulated to present a narrative to support the fear being pushed on the Queensland and Australian population to maintain the state of emergency beyond what is

necessary. The media and government is responsible for perpetuating the fear rather than promoting the truth of the situation.

Let people get on with their lives, to rebuild and restore faith with the truth prevailing once and for all will restore trust and confidence in the government.

Healthy people are not at high risk of complications from SARS-COV-2 (Virus) if they do contract it, they recover more quickly yet they have been locked up in their houses, excluded and segregated from their work and society. We have an innate immune system that you can naturally boost to support the immune system so it remains robust and this may lessen any symptoms if a someone does come into contact with the virus. The vaccines are not the only thing that can support or heal the body.

There is no justification for a state of emergency, particularly when we have evidence of how the state of emergency will be used to threaten, discriminate against, and destroy the lives and livelihoods of innocent Queenslanders. There are medical alternatives available other than forced vaccinations. Doctors were successfully treating high-risk COVID-19 patients, with safe and effective treatment protocols have been silenced. Countries like Israel with the highest vaccination levels are suffering from the highest levels of sickness and transmission of the virus.

Our freedom of Rights are being impinged and impacted upon by this state of emergency. Healthy people should not be locked up for the benefit for the immune vulnerable portion of the population. This susceptible group of the population are the group that requires support. Our rights to freedom of movement, taking part in life and protection from inhumane treatment are some of the rights encroached on by the extension of this state of emergency. Our right to access freedom to seek guidance from medical professionals has been removed because doctors are afraid to speak the truth of this situation and the short and long affects of the vaccines. New Zealand parliament recently was denied extension of these state of emergency powers.

We the people, with our constitution are the architects of the laws and how they are managed. Vote for the best interests of the people and reject the bill. We reject and rebut the extension of the state of emergency powers once and for all. There are alternatives the controlling a population.

Regards

Michelle
