---

To Whom it May Concern,

I wish to voice my position on the application to extend the Emergency Bill.

I have been, like most people, adversely affected by the current mandate.

I also believe there is much evidence to prove that the mandates have caused more harm than good to our economy and society.

I urge you to reconsider your position also and understand the impact it is having on the people you are meant to be governing.

Kind Regards,

Karine Davis
