Subject: Extension to Emergency Bill
Date: Friday, 4 March 2022 11:53:35 AM

To Whom This May Concern,

I am providing feedback with regards to the extension to the Emergency Bill. As a QLD resident I do not support this extension.

The ABS data does not indicate that this virus has eventuated to the extent that was forecasted. There is no longer a state of emergency in QLD.

The emergency is now the mental health of QLD. The Government has saved lives in the early stages of this pandemic however now with Omicron emerging, this is no longer relevant.

Queenslanders have lost their jobs from the mandates, the floods & the constant covid restrictions. It is now time to nurture Queenslanders & allow them to recover. The time to bring Queenslanders back together is now. The divide HAS to end. Mental health has suffered far to much.

End the emergency Bill & end the mandates. Queenslanders are not going to forget this miss you have created.

Regards,

Lee Champs
