Subject: Submission: Public Health and Other Legislation (Extension of Expiring Provisions) Amendment Bill 2022
Date: Friday, 4 March 2022 11:56:41 AM

To whom it may concern,

An extension of the emergency powers would be an absolute abuse of power as the COVID death rate is minimal in comparison to the annual death rate of disease and illness such as heart disease, cancer, obesity and the many other conditions people are suffering from underlying causes. Other causes such as suicide have risen and far exceed COVID deaths.

The people are growing wearisome of being ruled by the current government. The government were elected by the people, they are our employees and employees can be sacked. No where does it state that the government has the divine right of Kings and yet they appear to have given themselves this right.

By extending emergency powers the government are again highlighting their inflated opinion of their importance and disregarding the people they represent.

Regards
