---

Dear Parliament,

Please accept this e-mail as written confirmation that I object to the Extension of Emergency Bill that is being put before Parliament today 4/3/22.

I believe the extension of these powers is based on COVID-19 deaths in Queensland and COVID-19 case numbers, the Australian Bureau Statistics data is now showing exaggeration of these numbers. (ABS link below)

<https://www.abs.gov.au/articles/covid-19-mortality-australia>

I also have to question the accuracy of data released from the TGA regarding adverse reactions to the vaccines, I believe we are not seeing the full picture here regarding reactions and also deaths.

If these Emergency Powers are extended without a full investigation into their efficacy, more than likely the current mandates will remain in place dividing society further and leaving people out of work who choose to remain unvaccinated.

Yours sincerely,

Alison Grant
