---

I object to any extension of emergency powers.

It is an abuse of power and completely unnecessary. Up till now no good has come out of current Order. You have caused great fear and segregation and no less deaths or health issues. I would argue you have caused far more.

You have not improved the health of our state, in fact it has gone downhill with people unable to access diagnostic testing for anything other than COVID, COVID, COVID-19!! Sick to death of everything based on a flu virus! What draconian measures do you have in store for us next time?

Let's get back on track. Be kind to each other, prevent unnecessary suicides by job losses and fear, put money into hospitals instead of testing, vaccines and misinformation.

THERE IS NO EMERGENCY. THE EMERGENCY IS OF OUR GOVERNMENT'S MAKING. Do not give them unnecessary powers they have already abused - they shut down debate and caused division and even hatred amongst members of our community. Parliamentary debate has been stifled.
