

4 March 2022

Dear Sir/Madam

I am asking that you say "no" to extending the state of emergency powers in Queensland until 2024. Queenslanders' want their freedoms to return to what they were before 2020.

- We now have a two-tiered society in this state.
- I have been personally affected, by stress and medical issues relating to stress.
- I am not able to go to work in my profession and earn a living.
- Life has become a struggle and the real thought of poverty is in my mind daily. I know of people that have lost their homes because of these mandates.
- Our freedoms are being eroded away one bit at a time and now IS THE TIME to stand up and represent the people that are suffering and say "no".
- Freedom should be at the forefront of every decision a government makes, freedom for their people.
- Freedom to make an intelligent decision without losing employment.
- Society is breaking down and these mandates certainly has added to that breakdown.
- The vaccination does not work, everyone can catch COVID
- People are dying or have life threatening effects from the vaccine

Please listen to the people and say "no extension".

Kind regards

Karen McQuade
