### Notice of **OBJECTION** to Extension of Expiring Provisions Amendment Bill 2022

To Committee Members

I **do not** want an Extension to the Emergency Bill until 31 October 2022 and **object** to the need for further Emergency Powers.

- Data from Australian Bureau of Statistics shows that there have been a mere 2,639 Covid related deaths in more than 22 months of the pandemic.
- Covid cases and deaths in Queensland are declining. The Omicron wave was less than predicted. Queensland officials have publicly stated the peak has passed.
- All persons, vaccinated persons or not - can infect, become ill and recover from current Covid strain and future variants. areA greater pandemic is mental illness, staff shortages

The Public Health Measures and Mandates have led to:

- segregation and discrimination
- the crippling of community businesses and closures
- your fellow Queenslanders denied the ability to earn
- division within families, isolation of individuals, breakdown of community

Mandates have caused enough damage and hardship to the people of Queensland.

I have experienced the loss of my 31year career. My son no longer has a job, traineeship or access to appropriate mental health support.

There is no cause for an Amendment Bill. The health emergency is over.

I **demand** Mandates and Emergency Powers be revoked.

I **object** to the Amendment Bill for Extension of Expiring Provisions until 31 October 2022

Let Queenslanders heal.

Sincerely

Meegan Bool
