

To whom it may concern.

I am writing this submission in order to oppose the movement of the Public Health and Other Legislation (Extension of Expiring Provisions) Amendment Bill. Due to the high percentage of Australians who are vaccinated and the immunity that has come from many of the Australian population contracting the SARS-Covid 19 virus, it is unnecessary and irresponsible to extend the emergency powers given to the Chief Health officers and emergency officers. I would ask that this amendment to the bill be turned down.
