Dear committee members,

RE the Public Health and Other Legislation (Extension of Expiring Provisions) Amendment Bill 2022.

We the undersigned do not support any changes being made to extend amendments or extensions to head of power given that the pandemic is clearly over and any further measures including forced quarantine and mandates upon the general public are now unwarranted and indeed diminish public trust in government decisions relating to the common good including but not limited to mental health and economic factors.

Sincerely,

- Jordan RAYMOND, Mascha RAYMOND
