Dear Sir/Madam,

I am lodging a submission to request rejection of the "Public Health and Other Legislation (Extension of Expiring Provisions) Amendment Bill 2022.

The State of Emergency should cease following reports from the Australian Government, various State Governments in Australia, and governments across the world are confirming that since the omicron peak, the threat of serious illness and death have reduced significantly.

As a health practitioner I am witnessing more than 50% of my patients presenting with emotional/psychological duress from wearing masks, and restrictions from illogical State Government mandates.

I have lost a colleague and personal friend due to suicide (due to mandates in Queensland) and cannot see any logic in allowing this Amendment to pass in the Queensland Parliament.

Regards,

Yours sincerely,
