Re: Disapproval for Extension of Emergency Bill

Dear Premier Palaszczuk

I am writing with grave concerns for the morality of our State and country with the 2 previous 2 years of lockdowns and lockouts due to Covid State of Emergency.

Due to exaggeration of Covid Data it is apparent now that we should be able to "live with covid". As per our constitution we have invisible borders, which engulf the whole continent – we should never be locked out of any state (no state borders).

The covid measures including mandates have segregated our community – this is unnecessary and cruel.

Please do not extend the Emergency State in Queensland. The Australian population needs to make decisions for their own lives and health related issues. An extension of this will have disastrous outcomes for our community and the psychological impacts on our community in particular the younger generation. Self-sovereignty is important and it is time for the government to stop the over reach.

Thank you for putting this letter forward to your committee.

Yours truly

SUSAN MCDONALD
