To everyone who works to speak on behalf of the people in the Qld government,

PLEASE SPEAK ON BEHALF OF THE PEOPLE.

I absolutely do not believe there should be an extension to the emergency bill.

The truth must be heard. Since the floods in recent days, the media have neglected the topic of Covid - making it glaringly obvious how little we need to be bullied and manipulated into believing it is the single most important thing right now, and a truly life threatening hazard to the general public. Facts and data show that the definitive majority have very mild symptoms when exposed to Covid - whether vaccinated or unvaccinated. It has been completely blown out of proportion, largely due to the media.

In addition to this, the segregation of society as it currently stands is absolutely crippling to the public, to businesses, and to the nation as a whole. Those "front line workers" in 2020 (who were so highly praised) deserve to have their jobs back that were so ruthlessly taken from them. It is wholly unnecessary to push a vaccination which obviously doesn't stop the spread (as seen in the opening of borders in December) and is also NOT safe and effective, as seen by the many life-altering side effects that the media and government have clumsily tried to cover up. (And for what reason, might I add, if they have nothing to hide?) We demand you give us back our jobs, our lives and our freedoms.

Finally, we are now in the third year of this and it is time to move on. We have seen the mental health of millions of people suffer. I personally have lost a friend to suicide, and seen depression and anxiety claim so many of my friends. I've seen lives torn apart - not even from a respiratory virus, but from jobs being lost, businesses going under, and the split and divide in families, in communities, and in our country. Enough is enough, this needs to end NOW.

We will never stop fighting until you take a stand and fight for us.
