Hello,

My name is Jennifer Wiltshire of [REDACTED]
[REDACTED]
[REDACTED]

I am writing to say please stop the emergency bill in Qld and do not allow an extension of this.

This extension should not be passed.

I have suffered terribly because I've decided to not have the Covid vaccination. I am a registered nurse and I've lost my job, my ability to earn a living, my ability to move around freely, it's caused many problems with relationships in my life, because I've not been vaccinated.

These mandates have caused me no end of emotional pain and anguish for me.

I am not able to help my fellow Qlders now, in this time of hardship with the floods when so many people are needing help. Due to the mandates I can't even volunteer with the SES to fill sandbags because I'm not vaccinated! Enough is enough.

These mandates on my freedoms are wrong. I strongly believe that it is my choice to decide if I want a medical procedure or not, especially one that is still being trialled. The trial results that have been disclosed so far are terrifying with vaccine injuries and deaths being frequent. The figures have now been released as ordered by the court. These figures are not simply here say, they are the real figures from Pfizer.

The covid situation in Qld is greatly under control now and I know it is time to get on with normal life again and it's time to end these mandates now.

Please don't extend this emergency bill, please let us get back to lives again.

Yours sincerely,
Jennifer Wiltshire
