To whom it may concern,

I am NOT in favour of this bill. The QLD government has long abused their authority gained by the public health Act and emergency powers thus far. They have created division and mistrust in our community. They have used coercion and mandates to override our personal choices and we are dangerously close to losing all our freedoms in favour of their medical tyranny and vaccine passports. The COVID pandemic has been downgraded in most countries around the world to a flu, including many Commonwealth countries. Bill Gates (GAVI), has himself lamented that unfortunately the Omicron strain has been a more effective vaccine than the laboratory created one. The so called pandemic is over. There is no further reason to corral the population, to impose any further sanctions or impose greater enforcement protocols on the public, and the only response is now to end the emergency, assist the people to recover and move forward. Unfortunately for those that have abused their power in this time of emergency, they may have to face trial for their actions. I do not support this in any way and cannot support any Government that would abuse its citizens any further in such a way.

I make this submission on behalf of myself.

Regards,

Craig Debnam
