Hello,

I am writing to you to request that the state of emergency is not extended. The state of emergency is no longer required as the pandemic is now an endemic as described by the chief health officer. The mandates are now undemocratic, unconstitutional and do not serve any Queenslander. Australia is meant to be a democracy and currently we are anything but a democracy. The mandates have caused the social fabric of Australia and Queensland to be destroyed. Businesses have been destroyed, families have been destroyed, friendships have been destroyed because of these mandates. Queensland needs to reopen to all to allow the economy and society to rebuild after the destructive covid mandates. I have lived here most of my life, and I no longer recognise this city. It's time we move on and move back to a democracy.

Kind regards
Natasha Stokes
