To whom it may concern

This Bill has in my opinion done far more harm than good. It has detrimentally affected Queenslanders in every aspect of their lives: emotionally, mentally, psychologically, physically, medically and financially. I have personally seen and experienced the horrifying and totally unnecessary mandating of isolation and lockdown requirements, and unsubstantiated ridiculous mask wearing.

These mandates have been far more detrimental to the majority of people's health, mentally, physically and financially, than the harm that this virus has actually caused to the far minority of our population in this country, and elsewhere around the world for that matter. Please have some initiative to do your own research, and open your eyes to the factual evidence that has proven itself to be true, correct and honest, but is never permitted to be broadcast in mainstream media – well ask yourself why this is happening. Please, do not grant this government or any other government for that matter, the powers that will allow them to continue to implement these ridiculous, unnecessary and unsubstantiated restrictions and mandates to the people of this beautiful state, but to see it for what it truly is, a huge overreach of political and bureaucratic power for control of our people, well above what is acceptable within our democratic and free rights.

Thank you,
Robert Cater
