Dear Senators and Parliamentarians,

I wish you to advise you as a voting member I do not agree with the extension of Emergency Powers. Please consider all the below information before casting your voting rights, and how it will affect all the Australian public.

The Adverse reactions data has just been released from Pfizer themselves
There is 38 pages of ADVERS REACTION data that very clearly states that the Covid-19 Emergency use Medical Intervention is not safe

Covid 99.9% survival. All that have died have 2 to 3 comorbidities.
The stress of an unwarranted Pandemic has caused more deaths from Suicide than Covid itself.

Please do not vote to have this extended.
The Australian people, families and CHILDREN have had enough. How many families struggle to feed, cloth and keep a roof over the childrens heads!
It is time that this country is returned to its democratic state, without segregation, coercion, and bullying
Recently the SA Judge has clearly stated it is unwarranted and has lifted the Mandates for Police and Ambulance offices, with the same in NZ,
18 countries to date have ceased

It is time to stop the overreach, and follow the data

Louise Reid
