This email is a direct request to stop our elected Qld government from extending these emergency powers until 31<sup>st</sup> October 2022.

Here's some reasons why:

1. First and foremost, decisions made under these powers apparently 'follow the science'. Everyone knows this is not true because there is no science that warrant these measures. And when the people ask to see the science, there is none.
2. Cracks are appearing everywhere as people are slowly realising we have been sold a dud, thrown a dummy, lied to etc regarding the seriousness of COVID
3. Covid 19 was not what damaged our state and country, but the Qld government's reaction to Covid
4. The Qld government is way out of touch with the people they are governing. Waaay out of touch. And just requesting to extend these laws shows the government doesn't even know how out of touch they really are.
5. These powers limit our human rights.
6. This was not really even a pandemic (the WHO changed the definition of 'pandemic' under pressure from Pfizer and Moderna...true story),. And it was this definition that allowed the government to call Emergency Powers. The point is, they were falsely called in the first place...but then continued...we mustn't let them continue further.
7. The damage done to small to medium business is a disaster...the tax \$\$ spent during the last 2 years is a disaster.
8. Qld government rules that are still in place don't allow normal everyday people from going to a café because they aren't double vaxxed. Why have these not been scrapped?
9. These powers allow unelected bureaucrats to make decisions that massively affect the people of Qld...and that is not ok...that's not even close to ok.
10. Qld has the opportunity to be seen as different from WA, NSW and other states by not extending these powers

I hope someone actually takes the time to read this and respond.

REGARDS,

---
