

To whom it may concern,

I wish to voice my concern and strong opposition to the proposed extension of the Emergency Bill by Queensland Government.

Please do not approve an extension of this Emergency Bill!!!!

I believe that the measures and mandates legislated as a result of this Emergency Bill has caused major problems across population demographics in SE Queensland, and Queensland at large. I also believe that we are now "learning to live" with COVID19, with open borders and free travel. There is no longer any real need for the mandates, segregation, and ongoing job and economic loss that these measures have caused to many Queenslanders, and to many small businesses.

My husband has been laid off his work at Queensland Health at age 62 due to medical conditions that contraindicate him taking an experimental injection. Our youngest daughter was fired by her employer after 4 years faithful service, as her employer was afraid of being fined \$4000.00 for keeping her employed as an unvaccinated staff member. Our son in law has also been let go from his employment at [REDACTED] as he did not want to take the vaccine due to neurological issues from a head injury, which could have been further impacted and worsened by this vaccine. A well known side effect of this so called vaccine are neurological disorders including severe dystonia in younger people.

Surely people who have significant past medical history and issues have a personal right and choice to not take an experimental injection that could worsen their medical conditions??!!! This legislation is destructive, diminishing and degrading to honest, decent, peaceful, hardworking people with contraindicative medical conditions who fear unknown and significant side effects to taking this experimental medication. Medical exemptions are exceptionally rare but you are aware of that. Doctors are gagged and controlled by AHPRA. This needs to stop!!

The last 3 6 months have shown very clearly that the majority of people in hospital, critically ill with COVID19 are double vexed people. The people spreading COVID19 throughout the community are single and double dosed people.

It's time to end the mandate madness, end the segregation, end the heavy policing and forced government control, to end the "no jab no job" policies as ever one of these emergency legislation measures have been a gross violation of basic human rights and Australian constitutional rights. A democratically elected government a government elected BY the people for the people should not have the right or the power to violate the basic rights of their constituents to the extent that has been occurring over the past 18 months. I am aghast that there is even the thought of extending this "emergency legislation" any further!!!! Please end this now!

Yours faithfully,

Cathie Jahnke
