To Whom It May Concern,

STOP the mandates forced upon us - immediately!

Stop them being continued when there is now no clear nor present danger from the threat of the 'lethal' spread of Covid 19.

We have been *discriminated* against because of our *right to choose* what we will or won't put into our bodies - a violation of our fundamental human rights under the Geneva Convention - this *discrimination* continues until these mandates end.

To have to divulge our medical history to go about everyday living is a gross violation of our fundamental human rights - the states over-reaching enforced mandates have eroded any protection we should be afforded under our federal constitution.

The state overriding federal jurisdiction under the cover of covid is an absolute abuse of power and needs to stop NOW.

The meeting of the national committee was an absolute joke because for it to have teeth all parties must be employed by the federal government - what a charade!

We are tired of receiving directions on what we can and can't do according to an unelected public servant operating under the directive from government who themselves are belligerently operating under self-enforced emergency contingencies.

We are sick of government operating without any checks and balances usually afforded in a democracy - rather we have a dictatorial government making up their own rules and forcing them upon us when we do not subscribe to this fascists approach in any way whatsoever.

We want to support local business (sports clubs, bars, cafe's, restaurants) but can't because of draconian and useless mandated dictates.

We want to support our family members, through times of need when they are in hospital, but cannot because of draconian and useless mandated dictates.

We remind the government they are NOT responsible for our health – WE ARE.

STOP pushing for experimental drugs to be put into our children when there is little evidence of their efficacy, continually changing information and myopic reporting of their effect; short, medium, and long term.

The two years of threats, scaremongering, coercion, discrimination

etc...is nothing short of a disgrace and appalling - may we remind you that you serve us!

We vote, We matter.
