Subject: State of Emergency Extension Submission
Date: Thursday, 10 March 2022 6:39:06 AM

Dear Committee Secretary

I unequivocally oppose the extension of the state of emergency or the Public Health and other Legislation (Extension of Expiring Provisions) Amendment Bill of 2022 for the following reasons.

The SOE was justified based on the "now known to be flawed modeling" from the Imperial College in London which also touted a terribly inaccurate death toll from COVID-19. The predicted and reported severity of the Disease was and has been grossly overestimated and is inconsistent with real science.

The awful rise of suicides to me is the real pandemic. No Premier has addressed this, and worse continued to use fear and isolation tactics and strategies that contributed to this. The [REDACTED], I have read, has financial ties and vested interests in the vaccine sales and if this is the case, is a conflict of interests that is unacceptable. Middle-class and small businesses have been gutted while major corporations recorded astounding profits and engaged in overreach of powers that brought great harm and suffering to all. Why is the selling of alcohol an essential service, and haircuts and gymnasiums not, for example? Institutions like the police force have been used unlawfully by Premiers to brutally enforce mandates in many cases. Mandates are not laws and this brutality and obvious over reach of powers by the police force and our government has led to collective fear and mistrust of the very people who are meant to be serving us, the people. Many police officers left the force because their conscience determined this was not what they signed up for. To my mind this kind of governance is clearly a crime against humanity.

The enforced or coerced administration of a "vaccine" which is actually a medical experiment is unacceptable and criminal considering the long-term consequences of which are unknown. Healthy people are not at high risk of complications from SARS-COV-2 (Virus) if they do catch it. Healthy people are not spreaders of disease. If you catch the virus there are safe and effective treatment protocols for recovery which do not involve vaccination. Everyone I know who received a vaccine/s has still contracted Covid 19 and spread it to others, vaccinated or not. Natural infection is proven to give longer-lasting and durable protection against reinfection.

I respectfully urge you to conscientiously and wisely vote against in this matter and to realize a vote for is not in the best interests of the majority of the people, nor humane, nor on the right side of history.

Sincerely

[REDACTED]
