Subject: No extension to the emergency bill
Date: Friday, 4 March 2022 10:14:51 AM

Good morning,

I am writing to express my concerns for the extension of the emergency bill. This does not and should not be happening.

So my email is to decline to have:

NO EXTENSION TO THE EMERGENCY BILL.

This is nothing more than an over use of power from the Queensland Labour Government and up to this date there has been a gross misuse of power from this government.

Unnecessary lockdowns, mandates and forced vaccinations have been a result of such of these previous extensions to the "emergency bill"

Covid vaccinations have been rolled out and mandated to go into hospitality venues, which segregated the community, furthermore, trained professionals have been terminated and stood down unnecessarily causing widespread shortages in the nursing, education, police and ambulance services industries. Furthermore, businesses have gone broke as they just can't continue sustaining the loss of income that they continually have endured over the past two years. Trained professionals are now finding themselves unemployed and can not pay their mortgages, putting food on the table causing stress, anxiety and mental illness.

These powers have allowed the Queensland government to coerce its citizens to take an experimental vaccination that is still in trial phase, either get the vaccination or be locked out of the current society, locked out of work, locked out of their children's schools, locked out of weddings, funerals and the list goes on. The fact that the vaccination does not stop you from getting the covid virus, or passing it on and mask wearing suffices breathing. Studies have shown that lockdowns only put stress on individuals and close businesses.

Furthermore, the UK government has now admitted that the covid vaccinations have damaged the natural immune system of those who have been double vaccinated, worse if you have a booster. Most countries are now ending vaccine mandates due to the fact that these vaccinations do not stop you from getting the virus or spreading it.

The mean age of people dying of Covid in Australia is 81 for males and 85 for females in Australia, which is past their life expectancy. Out of the previously 2639 recorded Covid deaths they have now adjusted it to 83 people dying of covid, all the other deaths were dying with covid, and these cases have several underlying conditions, (ABS date, retrieved from 9 News). Let me tell you that more than 100,000 people have died of cancer during that same period and the figures for heart disease are much higher as well.

The vaccination injury and deaths have been far greater than the people that have died of covid (83), Pfizer had to put out its own data, reluctantly, on vaccination death and injuries. This will be found on their website.

The numbers were expanded to scare the population into getting a vaccination.

Do not grant an extension to this ridiculous Emergency Bill!

I have lost my job as a teacher due to these mandates and my husband is about to lose his job. We have two teenage boys!

Regards,
