No, I do not support any State of Emergency, there is no State Of Emergency in Queensland or any where in Australia, The Queensland State of Emergency measures still must abide by the Federal law and to adhere to our constitution and the Quarantine laws, Quarantining of healthy people without a court order is breaking the Federal Biosecurity Act 2015; and

For there to be a health emergency there must be evidence of such an emergency, just because there is inflated numbers, does not make it an emergency in fact between 01 January 2021 and 13 July 2021 one person had died from Covid and yet the Queensland Government had extended the State of Emergency twice without there being a state of emergency; and

The use of highly inflated case numbers due to a device which clearly was never designed for what it was being used for, the inventor of the PCR Test even said it can not be used as a diagnostic tool and anything over 27 cycles will give false results and the PCR Test in Australia was being used at 40 - 45 cycles, it is clear the PCR Test was used to manipulate the public and keep them in a state of fear; and

On 22 February 2021 [REDACTED] publicly announced the vaccine is a world wide experiment, people are being coerced and blackmailed into partaking a experiment without informed consent, which is against human rights in Australia, s51 (xxiii A) of the constitution, the Nuremburg Code, and many other laws within Australia and Internationally; and

People are causing themselves harm while wearing a oxygen limiting medical device and many studies have shown including Anthony Fauci's study he was involved with in 2008 clearly shows there will be an increased number of people dying from pneumonia due to the wearing of these oxygen limiting medical devices and under s51 (xxiiiA) of our constitution clearly states from the referendum which was held in 1946 no medical or dental can be forced upon the people of Australia and was upheld in 1996 Breen & Williams HCA and Wong v Commonwealth HCA 2009.
