Subject: No to public health amendment bill
Date: Friday, 4 March 2022 6:47:22 AM

Hello

I am writing to express my strong opinion that the public health emergency bill is NOT extended to October. These draconian measures the government has to impact and have power over people's lives must be stopped immediately.

The rate of hospitalisations due to Covid has dramatically decreased, now with the less severe Omicron variant circling in the community. There is zero reasons why the government should have the power to extend the emergency public health bill.

Let people get on with their lives- the time has come. Mandates must end. Where is the evidence that the vaccine protects against infection or transmission? There is none. It might protect someone for just a few weeks, where after that protection is known to dramatically wane.

The people have had enough. It is about time the government started listening to the majority.

Erin
