Subject: Submission to Oppose QLD Ammendment Bill
Date: Friday, 4 March 2022 10:55:39 AM

I am writing to oppose the Public Health and Other Legislation (Extension of Expiring Provisions) Amendment Bill in QLD and ALL Australian states.

I do not agree with the extension of public health officials and governments to manage the COVID-19 Pandemic. It is not needed or nessessary.

The people of Australia are sick and tired of the Australian governments lies and over reach of power and control over it's citizens.

Their constant and consistent push for vaccinations to maintain one's livelihood is reprehensible. It is clear that the COVID-19 vaccinations do not work. They are not safe nor effective, and they do nothing to stop transmission. There is more evidence coming out to say you are more likely to catch omicron if you have been vaccinated. Adverse reactions for these vaccines have been rampant. Millions of people world wide, including children have experienced devastating side effects. There is an abundance of research out there now highlighting this.

The COVID-19 Pandemic has been blown up out of proportion by the media. People who are unvaccinated pose no threat to others and should not be punished for wanting the choice, for standing up for their basic human rights and body autonomy.

The enforcement of mandatory vaccinations has caused tremendous pain and suffering to people all over Australia. Mental health is at an all time crisis. There are thousands of people sitting at home who are ready, wiling and able to work. There are experienced, intelligent professionals who have lost their careers in which they worked incredibly hard for. Who is going to pay for their university degrees if they cannot even do the thing they are passionate about, to earn money to feed their families?

I hope you can understand that the extension of such legislation is a concern for people all over Australia. Many have lost faith and trust in our government.

"We need to learn to live with the virus" are words said by health officials and politicians. Then drop the mandates, lose the masks, end the lockdowns and start treating ALL people with respect, kindness and compassion. Fairness, equality, inclusion and freedom needs to be restored.

Thank you
