Subject: Emergency Bill Extension
Date: Friday, 4 March 2022 11:27:14 AM
Importance: High

To Whom It May Concern,

I am writing to you to declare **I do not want an extension to the Emergency Bill AT ALL.**

Firstly, this whole debacle has segregated the community, including not being able to attend family events. Exclusion, spitting verbal abuse have been caused by these mandates.

Secondly, there has now been evidence that the mandates haven't assisted the health of Queenslanders as obvious by the case numbers, the mandates did not stop the spread. For example: The surge of Covid -19 when the borders were open in December 2021 with only the vaccinated and negative PCR test allowed over. Then all of a sudden we had waves of cases. Proving the lack of efficacy of the vaccine, which was originally sold to the public as the holy grail to stop the spread.

The Mandates are not about the health of Queenslanders. I have not seen once, the offer of extra health support offered by the Queensland Government in their press conferences. And yes I watch them. Not once was there other health advice given by experts in the Complimentary health field. Wouldn't you think, someone who is concerned for the health of another, would offer them all possible solutions that could work together? In order, to protect themselves to the highest of levels. Not once was their advice for healthy lifestyle to reduce riskNOTHING!

What is also interesting the report of, with Covid and from Covid, the reporting of cases of deaths which of course very sad but not as much as those who lost their lives due to suicide, heart disease, diabetes, cancer: are the deaths from these irrelevant...I know they are certainly higher than COVID deaths. And what is the deal reporting with Covid as covid deaths...that's falsifying information. This was admitted in Parliament.

Finally, Mandates have taken away people's income. Coercive control as an illusion of choice, is still coercive control. Under no circumstances should anyone have the right to dictate what I do to my body. Coercive control/ Mandates take that right away because I still need to make an income to feed my family. These mandates actually put my health at risk because I, you and scientists around the world haven't got a darn clue of the long term affects.

In conclusion, stop the mandates and let people choose what is right for them, their bodies and their health.

Thank you for your time.
