RE: PUBLIC HEALTH AND OTHER LEGISLATION (EXTENSION OF EXPIRING PROVISIONS) AMENDMENT BILL 2022 (BILL)

Committee Secretary

Community Support and Services Committee Email: cssc@parliament.qld.gov.au

Dear Committee Secretary,

As a Research Scientist who worked in a Virology Lab on RNA viruses I wish to formally advise that I **do not** support the Bill nor the extension of the state of emergency.

The false justification for the introduction of the State of Emergency (SOE) was based on the PCR test which was never meant to be used quantitatively ([REDACTED]). At the magnification used initially >40 the results gave a rate of ~97% false positives which created fear and panic in populations worldwide perpetuated by the media. Cases did not therefore equate to sickness.

Another point I would like to make is that the experimental synthetic mRNA drug called a vaccine is flawed in its mechanism of action as it has the human body produce the lethal spike protein. The data that Pfizer gave the Japanese Government showed that within 15 minutes the 50 billion nanoparticles of mRNA injected into the deltoid muscle entered the circulatory system, crossed the blood brain barrier, with high concentrations in many organs throughout the body and the highest concentration found in the ovaries because of the positive charge of the lipid layer coating the nanoparticles. All these cells take up the mRNA and produce the spike protein which is extruded to their cell membranes. There are various theories as to how our natural, innate immune systems react to these spike infected cells and the substituted codons in the mRNA and none are beneficial to health, short or long term. Various Insurance Companies worldwide are showing upto 40% increases in all cause mortality during 2021. These results are also being borne out in the latest UK data where 9 out of 10 deaths are in the "vaccinated" population.

It should also be noted that both the injected and injection free population can be infected, hold the viral load in their nasal passages and transmit the virus, therefore there is absolutely no scientific justification for the discrimination of one group over the other or any benefit for health care workers being "vaccinated" for the benefit of their charges.

Considering the above plus the fact that there is very limited safety data with this new technology, to be mandating and injecting this experimental genetic drug using the SOE as justification is not about public health but power, control and profits for the Pharmaceutical Industry and those associated with it, especially when there are proven effective alternatives available.

PLEASE REJECT THE BILL AND THE EXTENSION TO THE STATE OF EMERGENCY

Regards,

Patricia Abbott
