### Submitter Comments:

As a tax payer who has gone through Queensland's public school system my bare minimum expectation is that the federal and state governments meet their commitment to the minimum funding requirement as per the gonski review findings and ideally go beyond it. Queensland cannot foster an inclusive and equitable society if those struggling to make ends meet must also pay to allow their children to fully participate in school. We need state and federal governments to meet their funding commitments. Ultimately however, we need free education for all in Queensland.
