Submitter Comments:

We seem to get endless bills from our boys schools. It can be hard to keep up with all the payments. We have been warned in the past that this may mean our sons miss out or are excluded for being behind on payments. This type of exclusion can be devastating for the boys and feels totally unjust in a public school environment. We want our boys to feel comfortable and confident and school. We want all kids to feel that way at school. Higher and higher fees are making public schools inaccessible to those who need it most. Something needs to change.
