Submitter Comments:

I would like to suggest that the committee remove in it's entirety the language or amendments that seek to "modernise and improve education services by:enhancing the regulation of home education and streamlining the home education registration processremoving the use of gendered languageacknowledging wellbeing, inclusion and diversity"It's unclear how this globalist fake progressive mumbo jumbo about acknowledging wellbeing, inclusion and diversity has any impact on student performance. Keep wokeism out of Qld schools and get back to results driven policies which will give students skills and functional knowledge to enter the workforce or further education confidently. Don't muck with Home-schoolers either, except to make it easier to register, as there's good reason their numbers have risen and it's likely due to the wokeness and virtue signalling creeping into our schools. Thank you
