Submitter Comments:

Dear Committee Members I object to the proposal in the Education Bill 2024 regarding home educators having to use the National curriculum for their children's education plan. I am the Aunty of two home schooled children and witnessed their unique learning path since their births. I believe having to use the National curriculum is not the best choice and will limit these bright, creative and curious little people. Keep the choice of if/when to use the National curriculum with their parents. Thank you for your consideration.
