**Submitter Comments:**

I do not wish for this to go through as it would put unhealthy and unrealistic expectations on parents who have the best interest of their children in mind. Parents should be given the right to educate their children in the way that they believe is best. After all who knows each individual better than their parents? Traditional school setting is not the only way a child can learn and we should not be forced to conform to one mindset. This would be leaning even more into a totalitarianism society.
