Submitter Comments:

I believe in the freedom to choose to educate on behalf of the rights to learn without gender altering crap in our classrooms!! Governments have no place in any classroom!! Teacher need to go back to teaching factual stuff and not what between there legs! It's disgusting and disgraceful. What is being taught in our schools. Home schooling is for children who don't fit in, who don't follow your path!!!! The path to control, so I believe that homeschooling is more than compassionate way to teach but it's not harming our precious children!! Hands of our home schooling system!! Enough is enough this corruption is beyond respect! You have to earn it!! I believe our government want the kids to be taught to have sex at 4 and sex changes by 8 that's why parents are removing there children from the system, and you don't like it.. well guess what!! There NOT YOUR CHILDREN!!! So hands off [REDACTED]! I've lost 100 percent respect for all government controlled departments! Under this government you will see more children harmed! So I disagree with the decision to ban children learning about life and nature!! Yours annoyed K.Sunner
