I agree with home schooling, as I am a product of 70s and 80s communist teaching from WA, one of the damaged generations who learned nothing about nothing. I was destroyed by pathetic and cowardly and stupid teachers in high school in the early 80s. I am now 54 next week and I have had to fight all these decades just to be a person and struggling to get ahead.

Dear Queensland State Parliament, I have some concerns about the recent Draft Legislation on Homeschooling being tabled in state parliament. I've provided them in three points below: 1. Parents should be able to choose a curriculum that works for their child. The National Curriculum is designed for large classrooms of children, not for a personalized teaching environment. 2. The current registration and reporting system are working well, there is no need to change it. 3. Instead of making things more prescriptive for homeschooling families, perhaps the Government should review the school system and find out why so many students are leaving it. Kind regards, a concerned Queensland resident, Michael Watson
