RE: Submission Regarding Proposed Changes to Home Schooling Curriculum Why is there nearly a 300% increase to children being Homeschooled? Government needs to look at the reasons why the increase is so high. Stop trying to control people. Parents know better than anyone else what works in educating their children. They understand a learning environment and are well aware of the different methods of teaching that children learn from. They know this depends if a child is a Kinesthetic, Visual, Auditory or learns better when Reading and Writing. How often are these ways of teaching applied in the classroom? I want what is best for all children and our Educational System seems to think it is one systems suits All. One system does not suit all. You have been given a job by the public. Pay respect to the public and listen to the people who put you in the position you are in besides paying your wages. Yours sincerely I Hynson
