Submitter Comments:

The proposed bill is an overstepping on the families being privately educated by their parents and/or guardians. People choose to homeschool for many different and valid reasons. Some because their children would not be able to cope with the system or what the system is designed to teach.

By trying to force parents and/or guardians to teach their children in a way they cannot learn will not help anyone. Especially not the children or their right to free thinking and following their passions, which being properly educated in a homeschool setting allows. I am urging you to stop this bill directed at homeschoolers. Thank you for your consideration.
