Submitter Comments:

Parents must maintain the freedom and flexibility To be able to homeschool their children in a reasonable manner without restriction. The woke agenda that is fuelling sexualisation and gender fluidity in current school curriculums is causing parents to leave Qld schools and this is why we are seeing the uptick in home schooling. Furthermore the current curriculum is antiquated and does not keep pace with the requirements of a modern economy that adequately prepares children and teenagers to thrive as contributing adults. Parents have had enough of this indoctrination of their children. Regards Shannon Barter
