Submitter Comments:

The present home schooling system is working well, and as such is becoming much more in demand. The committee should look at why it is now so popular. Perhaps parents are dissatisfied with the changing school based culture & curriculums and as such are opting out. The way to fix something isn't to make it harder for families to engage in their alternative choices to the school based curriculum better to fix the current curriculum, and parents may not feel the need to opt out.
