Homeschooling should be an option in its current form. It is working! I have concerns that changes will be made when the system has worked for many years! I question why so many parents want to homeschool?? Please ask parents. I mean who really wants to have their kids home every day of the week and the commitment that home schooling brings to the parents. Parents who want to homeschool show a huge commitment to the education of their children. What is the reason they do not want to use the Public System? Education is about a child knowing how to read, write, do maths and learn skills to be able to function in the real world. Parents can personalize how their child learns. Particularly when students are in High School parents can tailor their learning towards a particular career path then a student in a bigger system. The Public system is made for large groups of very individual students. Home schooling allows for particular teaching strategies that are very specific to their own child
