### Submitter Comments:

I Oppose1. Enforcing Home Educators to use ACARA or one of the government's approved education programs to provide a high-quality education.For the following reasons:· The recommendation for more oversight from the Child Death Report is illogical.· The reasoning to use such a recommendation is illogical.· Continuity of learning would not work between current approved education programs (Steiner and Montessori) so why do individualised and personalised plans made by parents require a higher level of continuity?· Not even experienced teachers and school workers believe that ACARA equates to a high-quality education.· We are already providing a high-quality education where our children's best interest, safety and well-being are at the heart of why and how we homeschool. 2. The use of gender-neutral language.For the following reason:· The historical use of gender has served society for thousands of years quite well. The sudden rise and onset of a few people who disagree with something should not give rise to forcing an entire system to change. That is insanity.· The Education system is aimed at educating people. Dividing gender from sexuality is an ontological fallacy, is comes with an a priori theory which is fundamentally flawed.
